

The Leitz Icon Smart Labeling System is a beautifully designed tool that will dramatically improve organization and efficiency within the workplace.

Before the Leitz Icon, printing three different types of labels required three different machines - an electronic labelmaker, a PC-connected label printer and a desktop printer. The Leitz Icon printer can make 8 standard labels for envelopes, packages, visitor ID's, file folders and more from a single roll — at the same speed as a laser printer.

The Leitz Icon printer was designed for individual use and sharing, for maximum productivity. Easily connect via Wi-Fi networks, Access Point or USB.

Unique Intelligent Cartridges communicate to all devices so users know which label cartridge is loaded, (and how many labels are left) before they send a job to the printer.

# Smart Accessories

A built-in chip updates Leitz Icon Software with the size, material, color and amount of material left in the cartridge. Remove the guess work when printing away from the printer.

**One Cartridge, Many Possibilities** - Create most standard labels with our Continuous Cartridges. Choose a template, customize it and print! The software will print the label and the automatic cutter will trim to size.

**Easy to Load** - Cartridges easily snap in place and automatically load the material so it is ready to print. Never spool or thread labels again!

**Recyclable** - Dispose of the cartridge responsibly because it is made of easy to separate, recyclable materials.

**Mobile** - Add the battery pack to print wherever, whenever.

## Leitz Icon Battery Pack

Power your Leitz Icon on the go for up to 12 hours to print up to 1200 labels.

White/Gray 70020000
